The business of this institution is conducted upon scientific rinciples, as used upon tables carefully prepared by competent medical and mathematical calculators; and the rates of premium are as low as those of any responsible institution in this country or in England; and as low, undoubtedly, as is compatible with the safety of the insured and the stability of the Institution.

Every one will readily perceive the very great advantages to be derived by availing themselves of the protection offered by this Institution, which has been established from benevolent and philanthropic motives, under the influence and deep sense of the distress and humility to which many are reduced for want of an established principle, sanctioned by public opinion, and conducted under an organized responsibility, where all who are disposed to anticipate the decrees of Providence may, in times of health and prosperity, purchase with the results of their industry, the right to protection in sickness and adversity.

has proved good for nothing. I lost a large Safe—it was perfecily destroyed; but in the small Salamander I bought from
you, nothing was injured. Your obedient servant.

WM. T. CLEMSON.

The above letter shows that in a real hot fire RIGH'S SALAMANDERS are the only Safes to be depended upon. In the
Pearl-st. fire, eleven Safes, of different makers, were totally
destroyed, Rich's Safe alone bidding defiance to the flamea,
preserving notes, bonds and mortgages, to the value of
\$100,000. The Chillicothe fire is a parallel case—every Safe
but Rich's is destroyed. These repeated occurrences prove
incontestibly that Wilder's Patent Salamanders, with Rich's
improvement, are the best Safes made in the United States,
or in the whole world. They can be had at the depôt, Ne
